=====

Case 1: normal pass

Input : {'score': 85, 'documents_complete': True, 'attendance': 90, 'projects': 3}

Expected : Review

Actual : Review

Reason : score_ok, documents_ok, attendance_ok and projects_ok all passed

Result : matched

Case 2: attendance_ok fails

Input : {'score': 85, 'documents_complete': True, 'attendance': 60, 'projects': 3}

Expected : Hold

Actual : Hold

Reason : attendance_ok failed (attendance below 75)

Result : matched

Case 3: projects_ok fails

Input : {'score': 85, 'documents_complete': True, 'attendance': 90, 'projects': 1}

Expected : Hold

Actual : Hold

Reason : projects_ok failed (less than 2 projects)

Result : matched

Case 4: score boundary (exactly 70)

Input : {'score': 70, 'documents_complete': True, 'attendance': 75, 'projects': 2}

Expected : Review

Actual : Review

Reason : score_ok, documents_ok, attendance_ok and projects_ok all passed

Result : matched

4 out of 4 cases matched
